

Environmental Policy

Tullyleek Precast Concrete Limited is committed to achieving the highest standards of environmental performance, preventing pollution and minimising the impact of its operations. The companies aim is that no lasting environmental damage occurs as a result of its activities, and policies are being implemented to ensure that all its operations meet or exceed the requirements of legislation and applicable best practice.

Tullyleek Precast Concrete Limited regards compliance with relevant environmental laws, and the adoption of responsible standards where no legislation exists, as an integral part of its business strategy and is committed to considering the environmental impacts associated with its products throughout their Life-Cycle.

Tullyleek Precast Concrete is committed to improving its environmental performance by the implementation of key objectives that include:

- Reduction in the use of virgin raw materials by increasing the use of recycled material in production.
- The reduction and recycling of scrap and waste materials for re-use.
- Increasing use of materials which are from a sustainable source.
- Reduction in the quantities of disposable materials used such as packaging.
- Increasing use of materials which are less harmful to the environment.
- Storing materials in a safe manor so as to minimise the risk to the environment.
- The continuing reduction of dust and particle emissions.
- The continuing reduction of noise pollution.
- The protection of surrounding water courses from environmental damage.
- To minimise our energy requirements and thus aid in the reduction of CO2 emissions.

Tullyleek Precast Concrete Limited will continue to raise environmental awareness within the company through the development and training of its employees and will communicate openly and consult with customers, suppliers and others on relevant environmental matters.
